PROFILE

Seasoned software engineer professional proficient in orchestrating the full lifecycle development of successful web applications. Demonstrated prowess in software design, implementation, and project management across various frameworks, tools, and programming languages, with a particular emphasis on Angular and Java technologies.

PROFESSIONAL EXPERIENCE

Mobile Programming LLC

Software Engineer

Pune, Maharashtra

Oct 2021 – Present, Full-time

Xcelerator Admin Console (for Siemens DISW)

Oct 2021 – Present

- It is a web application for customer administration to manage subscriptions of Cloud SaaS Products.
- Rebuild the project using Angular and Spring Boot, significantly improving performance and scalability.
- Apply agile methodologies to accelerate development and testing cycles for bug fixes.
- Oversee new product releases, coordinating development and QA testing, manage deployments to production with CI/CD pipelines, and showcase new features during sprint reviews.
- Architect a solution to serve Angular bundle files from CloudFront, handling requests via Kong Gateway on AWS.
- Implement security measures, including fixes, patches, and configuration changes, to effectively mitigate risks.
- Ensure code stability through comprehensive testing and quality assurance practices.
- Streamline deployment processes across Zeus projects by creating a unified GitLab YAML configuration, enhancing workflow consistency and team collaboration.

Java, Typescript, Spring Boot, Node JS, Angular, Web Application, Microservices, Docker, Kibana, Gitlab, Coverity, Sonar, AWS, VS, VS Code, Postman, Git, Jest, Junit

Paramatrix Technologies Pvt Ltd

Software Engineer

Mumbai, Maharashtra

Jul 2018 – Oct 21, Full-time

Reliability (for Kotak Securities)

Aug 2019 – Oct 2021

- It is a banking MIS System to view the account/customer level reports.
- Comprehensively analyze and understand the Client Requirement Forms (CRFs), ensuring a clear understanding of project objectives, specifications, and client expectations.
- Implement UI and efficient Optimization, data structures, and caching mechanisms to streamline data retrieval and processing, reducing latency and improving user experience.

Angular 5, MS-SQL, MVC, Java, Web API, Github, SVN, Eclipse, VS Code, Postman, Git

Customer Relationship Management (for Kotak Securities)

Sep 2018 – Jul 2019

- It is a application handles all the service request which are raised by customers.
- Active participation in all SDLC phases for change requests, spanning from requirement gathering to deployment.
- Create and managing schema objects and maintaining Referential Integrity.
- Created SSIS package to populate data from various data sources.

Angular 5, MS-SQL, MVC, Java, Web API, SSIS, SSRS, SVN, VS Code, Postman, Git

EDUCATION

St. John College of Engineering and Management

Bachelors Degree in Computer Science

Palghar

Jul. 2014 – Jul. 2018

Ukkarsha Vidyalaya and Junior College

General Science

Virar

Jul. 2012 – July. 2014

SKILLS

Languages: C, Java, JavaScript, TypeScript, SQL

Technologies: Angular, Node.js, Spring Boot, MySQL, MongoDB, Git, SVN, Docker, AWS, Kubernetes

Methodologies: Agile, Scrum, OOP, Functional Programming, DevOps, CI/CD, TDD

AWARDS & ACHIEVEMENTS

Pat On Back: Led the inception-to-completion development of a web app using Angular and Spring Boot(Jan 2023)

Team Award: Completion of our Quarterly development task, delivered promptly and with precision.(Jun 2020)

PROJECTS

Exam Portal | [GitHub](#)

- The Angular-Spring Boot MCQ Test Platform is a web-based application designed to facilitate categorically organized multiple-choice question (MCQ) tests for users. Admins can create quizzes by defining categories and populating them with questions, while users (students) can access these quizzes and attempt to solve them. The application utilizes Angular for the frontend interface, Spring Boot for backend functionality, and MySQL for database management.

Automatic Image and Video Colourization using Deep Learning | [GitHub](#)

- This project aims to enhance automated colourisation systems for monochrome and black and white images/videos by addressing existing challenges such as colour inconsistency, saturation issues, and inaccuracies in bright environments. Through advancements in deep learning architectures and image processing techniques, the objective is to develop a more efficient and accurate colourisation process, reducing the need for manual intervention and improving overall results.
